

Looking for new trading opportunities?

As a Fintech Specialist, eBroker is always open to global trading opportunities in different markets and in different asset classes. On April 19th 2023, we hosted an online Webinar event whereby speakers from the Singapore Exchange (Equities Division) shared with us *"Trading Opportunities in the Singapore Equities Market"* and many financial institutions participated in this event. We were honored to have Mr Jason Li, Vice President of Global Sales and Origination at SGX, and Ms Candace Li, Vice President of Equity Research and Financial Literacy at SGX, as the keynote speakers for this event.

In the Webinar, Jason provided an overview of SGX, including the exchange's key developments, market overview, market structure and some popular traded products. This helped to provide participants with indepth and up-to-date knowledge of the Singapore Equities market.

Candace further provided a comprehensive overview on the recent years' performance of SGX-listed companies and representative products "S-REITs" (Singapore Real Estate Investment Trusts). Her analysis provided participants with valuable knowledge and information.
