

## 2024 Nov 28 AI Webinar:

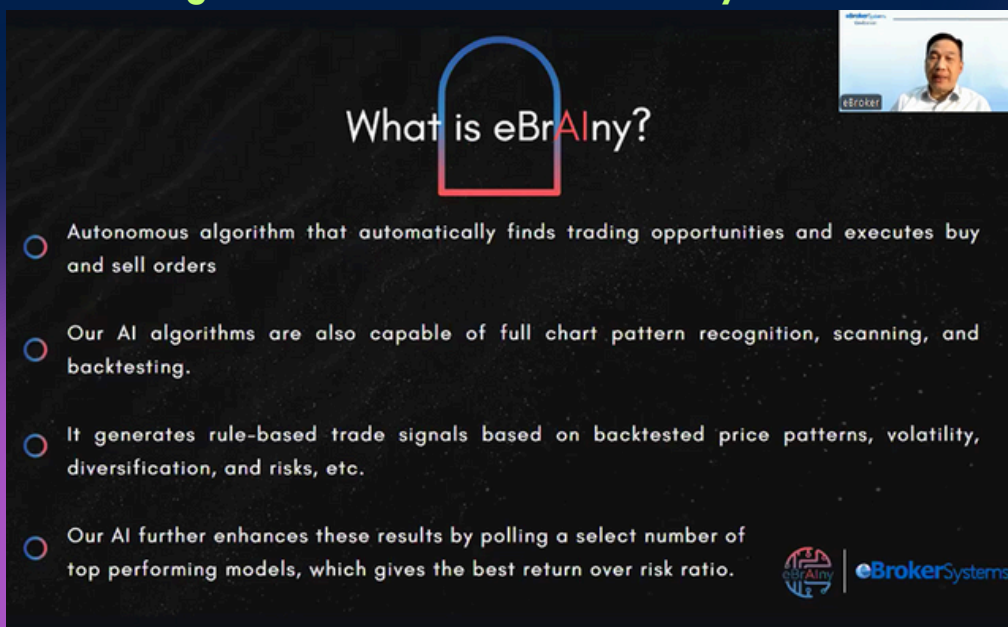

### Grand Launch of eBrAlny AISI

*Thank you all for joining our Webinar, it has been great to see all of you!*

In this Webinar, our keynote speaker, Douglas Chan (founder of the eBroker Group), focused on "the application of eBrAlny in portfolio management" and the "Launch of eBrAlny AI Strength Index AISI," providing insightful information to participants from different financial institutions.

The "star" of this Webinar, eBrAlny, is an innovative proprietary AI technology developed by eBroker. It has been built on deep learning algorithm and can be applied in the fields of risk hedging and wealth management. For the last 2 years, our R&D team has built more than 200,000 AI Strategies based on combinations of different parameters and conducted countless backtests and live tests in the market. During the Webinar, Douglas shared our experiences on the implementation of different AI strategies based on different parameters such as technical indicators and product correlations which led to different outcomes.

Douglas also highlighted the performance of AI strategies focussing in single market such as Hong Kong, US, Japanese or A-shares market and compared that with the performance on combined portfolio for multiple markets. The test results showed that **the combined portfolio achieved a good PnL with minimised volatility.**

**What is eBrAlny?**

- Autonomous algorithm that automatically finds trading opportunities and executes buy and sell orders
- Our AI algorithms are also capable of full chart pattern recognition, scanning, and backtesting.
- It generates rule-based trade signals based on backtested price patterns, volatility, diversification, and risks, etc.
- Our AI further enhances these results by polling a select number of top performing models, which gives the best return over risk ratio.

In the second session of the Webinar, Douglas announced the launch of AISI, Artificial Intelligence Strength Index, generated by the evolving technology eBrAlny which indicates the daily strength or weakness of a specific market. It utilizes AI to analyze historical market conditions, assess market trends, and can be used as a tool to identify investment opportunities in different markets and various types of financial products according to your own investment strategies.

## **Good News- AISI FREE TRIAL**

Want to try it out?

We will be rolling out a brand new app for AISI info and also embed AISI into our new DC3 to all our clients soon.

Don't miss out and stay tuned on our latest news!
